Dear Professor Fattahi,

I hope this message finds you well.

As the coordinator of the PhD program in Systems Engineering at Petroleum-Gas University of Petroleum and Gas from Ploiesti - Romania,

I would like to kindly invite you to give one or more online lectures to our doctoral student sin domain Systems Engineering .

Your expertise and work in the field are highly appreciated, and I believe our students would greatly benefit from your insights—whether

focused on research trends, case studies, or key theoretical aspects.

We are flexible regarding the schedule and format, so please let me know what might work best for you. We can gladly provide technical support and coordinate the logistics on our side.

Looking forward to hearing from you, and I hope you will consider joining us in this academic exchange.

Best regards,

N. Paraschiv

Hello Professor Paraschiv,

It would be a great pleasure for me to contribute to the development of your students.

The format I have in mind is to follow the progress of the Ph.D. students and to provide feedback and corrections on their work (papers, reports, etc.). In other words, a co-supervision of Ph.D. students. This setup would fit better with my workload, schedule, and the time difference between Quebec and Romania, which is not always ideal for direct interaction.

I would like to know the number of students involved and the expected duration of their Ph.D. programs.

Thank you and have a great day.

Best regards,

Jaouhar Fattahi, Ph.D.

Professeur Associé

Faculté Sciences et genie

Université Laval: - Canada
